

Final year Artificial Intelligence and Machine Learning student focused on building AI-driven products and scalable full-stack systems. Experienced in developing MERN-based applications and integrating AI/ML and LLM capabilities into real-world solutions. Skilled in Python and AI. Seeking AI Engineer / SDE roles to build impactful, production-ready applications.

SKILLS

|           |                                                                                                                                                                    |
